Legenda

LED

It marks the models with integrated LED included in the lamp, which is the result of Foscarini designing and engineering.

ENEC

The label ENEC (Electrical Certification concerning European Standard) is a voluntary label granted by third organizations. It certifies that a product complies with the EN 60598 standards and has been designed and manufactured by companies with an approved UNI EN ISO 9001 quality control system.

Declares that the manufacturer produces light fittings which comply with the requirements of the EN 60598.

Classe I

Class I° luminaire: it's necessary to connect the device to the yellow/green protective conductor (earthing).

Classe II

Light fittings whose safety is guaranteed only by the double and/or reinforced insulation of all parts, with no earth.

Luminaire suitable for installation on normally inflammable surfaces.

IP

IP Protection Degree

IP20: protected against the penetration of solid objects greater than 12 mm and non protected against liquids.

IP44: protected against the penetration of solid objects greater than 1 mm and protected against splashing water.

IP65: dust-tight and protected against water jets.

Energy efficiency classes

The energy efficiency classes for light appliances set out by EU regulation no. 874/2012 are calculated on the basis of the Energy Efficiency Index (EEI) and range between A++ (maximum efficiency) and E (minimum efficiency).

Note:

*

The dimmer could cause flickering of the light in case of use of a bulb with a lower wattage than the minimum indicated. It is not possible to guarantee the proper functioning of the dimmer with LED retrofit bulbs or compact Fluo bulbs with integrated power supply.

Special colours:

it shows the possibility to order the lamps in a different color than the standard one (generally in the lampshade); minimum quantity, price and lead time on request.

Azienda certificata

UNI EN ISO 9001
UNI EN ISO 14001

CSQ - IQNET

The CSQ-IQNET label is valid all over the world. It certifies that Foscarini runs a quality management system which complies with the UNI EN ISO 9001:2008 standard, to guarantee a high quality level for what concerns project, development, production and distribution of its products.

CSQ ECO

This label is valid all over the world. It certifies that Foscarini runs an environmental management system which complies with the UNI EN ISO 14001:2004 standard in order to guarantee company's commitment to continual improvement of its environmental performances.

Excerpt from sales conditions

1. Our prices are net ex works.
2. The prices include: carton packaging, transformers for low tensions. Prices do not include bulbs, if not differently stated.
3. The prices here contained refer to materials complying with the technical standards of the market this price list is meant for. Any request for material complying with other standards shall be quoted separately.
4. Goods are carefully inspected and accurately packed before shipment, Foscarini Spa therefore declines any liability for transport damages.
5. The goods are dispatched at the buyer's risk, even if sent free domicile.
6. Claims must be notified by registered mail addressed to our head offices within 3 days from receipt of the goods.
7. Any litigation falls within cognisance of Venice Italy Law-Court.
8. Dimensions and colours indicated have a tolerance due to the characteristic handwork of materials.
9. This price list can be subject to alteration without any notice.
10. Products images and configurations may vary from price book, catalogues and website from the actual merchandise, including but not limited to cords, cables, color, price, dimension, descriptions, details, dimmer.
11. Foscarini reserves the property of the goods until full payment of the same.
12. Prices are expressed in Euro.
13. This price list replaces any previous one.

Interactive tools

iFoscarini app

iFoscarini an app designed for all design enthusiasts who wish to customise their surroundings with the unmistakable personality of Foscarini models.

With captivating and emotional graphics and extremely user-friendly it allows users to insert lamps in rooms and settings which are caught on camera each time or picked from an archive of pictures. Available on the Apple Store and Play Store the iFoscarini app is a very effective tool that is extremely simple to use.

Social media

Foscarini is present on all the main social networks with systems and languages suited to each individual channel and type of user:

- **Facebook** to create and maintain public relations, communicate news and projects, share news, images and films;
- **Instagram** to view projects and stimulate users to create images with Foscarini models.
- **Twitter** publicise events, initiatives, news and links in brief, high impact messages;
- **Pinterest** to share images of Foscarini models and initiatives, subdividing them into theme boards;
- **LinkedIn** to create and maintain relationships with sector operators and share professional contents

foscarini.com

Packed with content, the www.foscarini.com website keeps you up-to-date on our products, events and cultural initiatives at all times. The Video Stories section gives you the chance to find out about the concept and development of some of the most important Foscarini products. Information on the company, detailed technical data sheets for all models, assembly instructions, 2D and 3D designs as well as photometric curves can all be downloaded.

myFoscarini

With the same spirit that provides new ideas in lighting design, Foscarini creates its own more efficient programs for customer and partner communication, for instance, **myFoscarini**, a proprietary it platform, an absolutely innovative, highly flexible and transparent tool providing customers with complete information and full range of functions. With just a few clicks in my foscarini you can:

- check the availability of lamps and the shipping date
- Enter your orders, reserving lamps directly from Foscarini's central system

- track your order status
 - consult sale conditions;
 - download admin documents such as transport documents and invoices;
 - prepare a quotation;
 - download: images, logos, PDF and excel price lists assembly instructions, certifications and energy labels.
- And all this 7 days a week, 24 hours a day.
If you haven't registered yet request your password from Foscarini Customer Care.

Light Sources

According to the European norms, starting from 1st of September, the lighting fixtures equipped with bulbs that can be replaced by the final user have to be compatible with A+ bulbs (LED retrofit). The Foscarini lamps comply already with this requirement. Since a couple of years our price list states the possibility to use led retrofit bulbs besides the recommended halogen bulbs.

If the fixture is supplied with a Pyrex glass, it has to be removed.

If a dimmer is foreseen (whether included or not), it has to be used at full power in order to avoid damages to the retrofit bulb.

Even when using dimmable led retrofit bulbs, the correct dimming function is not granted.

The actual state of the art of LED retrofit bulbs does not allow to obtain the same light flux as the halogen bulbs recommended by Foscarini.

In order to give a more complete information, we remind you that the exit of halogen bulbs from the EU market has presently been postponed to September 1, 2018.

This table contains the necessary information to purchase the correct light source (Foscarini models with integrated LED excluded).

The light tones may vary from one bulb to another. Foscarini recommends the use of **warm light bulbs** for its whole collection.

The light bulbs available on the market may feature technical specifications with various graphics and definitions, but a warm light tone is generally described as: **Warm White - 2700- 3000K° and CRI > 80.**
